Syahrul Puji Utomo

Senior Frontend Engineer

+62 857-1200-0166 • syahrulputomo@gmail.com • LinkedIn • GitHub
Cibinong, Bogor, West Java, Indonesia

Profile

Experienced frontend engineer with a strong track record across web development. Adapts eagerly to new tech stacks and consistently delivers on time. Passionate about web performance, observability, and multiplatform development.

Skills

Languages: JavaScript, TypeScript, Java, HTML, CSS
Frameworks & Libraries: React, Next.js, Angular, Vue, Nuxt, Redux, Zustand, Vuex, Vuetify, React Router, Chart.js, jQuery
Styling: Tailwind CSS, Sass, Stylus, CSS
Full-stack & Platforms: Node.js (BFF services), Laravel, Magento
Practices: Web Performance (Core Web Vitals LCP/CLS/INP), Observability, Clean Code, CI/CD, MVVM, Service Workers, Testing
AI & Tooling: AI feature development, OCR, Claude Code skills, MCP tools, Chrome DevTools

Experience

SDE II Web — Halodoc

May 2025 – Present • Full-time • Jakarta, Indonesia • Hybrid

- Single-handedly develop and maintain Halodoc's B2B Pharmacy webapps (Principal, Distributor & Merchant portals) and their BFF services.
- Shipped AI-powered features end-to-end: **OCR Order** (captures purchase orders from photos/PDFs straight into structured carts), **Principal AI** concierge for Pharmacy Principals, and **Mercia**, an in-app AI assistant for Merchants.
- Work agentically every day inside Halodoc — author and run a suite of custom Claude Code skills and MCP tools (code-graph search, DB access, org-memory, Chrome DevTools) to automate feature scaffolding, code review, test generation, and performance audits.
- Built the **"No Green, No MR"** agentic Core Web Vitals pipeline that measures, fixes, verifies, and ships LCP/CLS/INP improvements with trace evidence — no fix merges unless it lands in Google's "good" zone; grew Search Console "Good" mobile URLs from ~487 to ~18,680 (Halodoc Engineering blog).

Senior Frontend Engineer — Pintar Ventura Group

Aug 2023 – May 2025

- Developed features for the Internal Dashboard of Klikoo (PPOB) and the B2B Dashboard of Klikoo Business.
- Converted the existing codebase to the MVVM design pattern, boosting engineer productivity.
- Led tech initiatives: Web Performance, Clean Code, Observability, CI/CD.
- Improved Internal Dashboard page load from 13+ s to under 4 s via a Service Worker implementation.
- Decoupled components to achieve better reusability.

Frontend Engineer — Aleph Labs

Apr 2023 – Aug 2023

- Built a Hospital Information System for Siloam Hospital, improving inpatient and outpatient workflows.

- Built the Astra Internal Dashboard to improve the KYC process for FIF users.

Web Platform Engineer — Tokopedia
Jul 2022 – Apr 2023

- Improved the CLS score on HomeCarouselWidget from 2+ to under 0.1.
- Acted as PIC of the Recommendation Module for the Tokopedia Web Platform.
- Refactored the Tokopedia Lite Homepage, raising code coverage to 90% and improving the CWV score.

Frontend Engineer — GoFood
Sep 2022 – Dec 2022

- Successfully delivered gofood.co.id on time.
- Contributed feedback during design reviews.

Senior Web Developer — LinkAja
Sep 2021 – Jun 2022

- Built LinkAja reconciliation tools to improve the Recon process for each Payment Channel.

Frontend Engineer — Weekendinc
Sep 2020 – Sep 2021

- Built e-commerce platforms (Sharp, PrimaFresmart, CnF) with Magento — delivered from scratch in under 2 months.
- Built Superlive.com and its CMS using Laravel to accelerate campaign operations for Djarum Group.

Frontend Engineer — Medigo Indonesia
Sep 2019 – May 2020

- Developed and maintained all frontend products at Medigo using Nuxt, Vuetify, Vuex, Stylus, jQuery, and Laravel.

Education

Muria Kudus University — Information Technology *2012 – 2016*
Thesis: Time series forecasting with Exponential Smoothing.

Projects

- **GoFood.id** — Next.js, Tailwind CSS — gofood.co.id/en
- **Siloam Hospital HIS** — Next.js, Zustand, Sass — Hospital Information System for inpatient & outpatient processes.
- **Astra Internal Dashboard** — React.js, React Router, Redux, CSS — KYC process dashboard for FIF users.
- **Medigo Kiosk** — Vue, Vuex, Tailwind — Self-service appointment kiosk for KlinikPintar patients.
- **Medigo HealthCenter Rating** — Vue, Nuxt, Vuetify, Chart.js, Stylus — Patient rating & feedback system for doctors, nurses, and hospital facilities.
- **Prima Freshmart E-Commerce** — Magento — primafreshmart.com
- **Prima Freshmart Dashboard** — Custom dashboard — Monitors stock across stores and processes shipper orders.
- **Superlive** — Laravel, jQuery, Sass — superlive.id
